# Security and Privacy

Hi, I'm trying to improve the security of my site and provide better ways to reach me.

## Informal bug bounty

If you find any vulnerabilities on my websites, please let me know! You can reach me at <mailto:tonytash@pm.me>, please note that it may take me some time to reply. I don't have a security budget or a budget for running this site, but I'll try to make up for it.

## Onion site

Down again. Will fix one day.

**Update:** currently offline since I'm using the port the TOR socket listens on for something else.

## I2P site

Briefly was online but not maintained at the moment.

## Todo list

- Set up tor site
- Set up i2p site
- Fix peertube or odyssey
- Actually get owncast running w/o a simple proxy
- ~~Try to get JPEG-XL images here~~ waiting on browser support first.

## Ways to chat

- Email
  - Make sure to use my public key
  - Encrypt messages using key:

todo - put non-expired key

- Yes it's a janky way of putting a public key, but it's here in case the Nextcloud share expires (or gets edited)
- I will fix this later.
- IRC
  - now on libera instead of freenode
- XMPP
- ~~I have OTR for Matrix, IRC, Telegram, XMPP, and (maybe) Zuccbook, Discord and SIP if you notify me ahead of time.~~ nope. zucc will ban you for this.
- Mumble
  - No longer maintained. But please don't use discord.
